

Strengthening Early Education in Schools, Districts, and States: Resources for Families

REL

The ten Regional Educational Laboratories (RELs) have developed resources for families to help them prepare their children to enter elementary school and to support them in the early grades. The resources included here, which are representative of many that have been developed by RELs, address a number of important topics. The resources are in a variety of formats including websites, fact sheets, activity sheets, videos, blogs, and reports. To access resources from any of the ten RELs, go to https://ies.ed.gov/ncee/edlabs.

Setting Your Children Up for Success in School

Attending school is an important milestone in the lives of children and their families. These resources provide guidance for families that will help them support their pre-kindergartener and kindergartener's learning and development at home, and recognize the importance of good attendance. Support from families will help ensure children are successful in school.

Supporting Your Children's Literacy Development

It is never too soon to start supporting children in learning to love reading. RELs have developed numerous resources that support families as their children build foundational literacy skills at home.

Supporting Your Children's Mathematics Development

Young learners can develop mathematical skills that will serve as the foundation for their future learning as they progress through school. RELs have developed several products that may help families support their children as they develop mathematical skills they will build on as they move through the elementary grades.

Integrating Learning and Play

Families should feel confident they are helping their children learn while they play together, and that children can learn through play at school. In addition, a play-based approach may benefit children's well-being. Although these REL products are designed for educators, families may enjoy exploring how play can support learning in classrooms and at home.
