

# REL PACIFIC PARTNERSHIPS AND PROJECTS

Partnerships and project teams work to improve their education systems and outcomes through the use of research and evidence.

Map not to scale.

## What is a REL Pacific Partnership?

A Partnership is an organized group of individuals who work together on high-leverage issues to improve education in their jurisdictions through the use of research and evidence. Members of Partnerships include stakeholder representatives from K–12, college, government sectors, workforce, and other community groups. Any interested stakeholder is welcome to join an existing REL Pacific Partnership or inquire about developing a REL Pacific project.

## How do members contribute to the success of the Partnerships?

Partnership members review research, examine data to better understand their existing systems, and identify improvement strategies to reach the Partnerships' goals. Members participate in face-to-face and virtual meetings, discuss and align their improvement efforts, support the development of applied research studies about their systems, and engage in goal setting for the Partnerships.

## REL Pacific's Priority Areas

In collaboration with the Partnerships, REL Pacific has identified five priority areas to drive projects and system improvement efforts forward.

### College & Career Readiness & Success

How can we help more students prepare for and succeed in college, careers, and life?

### Professional Learning

How can we design professional learning systems that help teachers change their practice to improve student outcomes?

### Language & Literacy

How can we build students' literacy skills in their first and second languages?

### Social & Emotional Learning

How can we help provide supports for social and emotional learning to improve student outcomes?

### Data Use & Readiness

How can we support increased institutional data use for understanding and improving system outcomes?

Regional Educational Laboratory (REL) Pacific serves educators in American Samoa, the Commonwealth of the Northern Mariana Islands, the Federated States of Micronesia, Guam, Hawai'i, the Republic of the Marshall Islands, and the Republic of Palau. To address the priorities and interests of these jurisdictions, REL Pacific works in partnership with school districts, state departments of education, and others to use data and research to improve academic outcomes for students.
