

Handout 3: Sample Logic Model from Early Childhood Workforce Research Alliance

Problem statement: Early childhood programs vary in quality, experience considerable staff turnover, and employ educators who often lack the skills and knowledge to prepare children for kindergarten.

Early Childhood Workforce Research Alliance Logic Model - Sample

Assumptions: *Interagency collaboration will be possible because leadership will support efforts to collaborate; *A well-prepared workforce will improve student readiness for kindergarten; *An increase in the quality and support for early childhood teachers will increase retention.
