

Indiana 2010 High School Graduates Vary in Early College Success

In fall 2010, 32,564 Indiana high school graduates enrolled in two-year or four-year institutions of higher education in Indiana.

Two-year institutions

30%
(9,812)

Four-year institutions

70%
(22,752)

Indicators of Early College Success¹

Enrolled in only nonremedial college courses

Persisted to a second year

Earned all attempted college credits

Early college success by all indicators

Overall, **92%** of students were successful according to at least one indicator of early college success.

But only **50%** of students were successful according to all three indicators of early college success.

Upon further investigation, rates of early college success across all indicators varied by the following:

Academic Preparation

Students who earned a Core 40 Diploma in school with honors were more than twice as likely as those who earned a Core 40 diploma without honors to have early college success by all indicators.

Core 40 + honors
81%

Core 40
36%

College Type

Students in four-year colleges were five times more likely as those in two-year colleges to have early college success by all indicators.

Four-year college
66%

Two-year college
12%

Race/Ethnicity²

White/other students were more than twice as likely as Black students to have early college success by all indicators.

White/Other
53%

Hispanic
40%

Black
26%

High School Absences

Students who missed fewer than 15 days in high school were more likely to have early college success by all indicators compared with students who were absent 31 or more days in high school.

Fewer than 15 days absent
62%

31 or more days absent
36%

Economic Disadvantage³

Students not eligible for school lunch programs were more likely to have early college success by all indicators compared with students who were eligible for school lunch programs.

Not school lunch eligible
55%

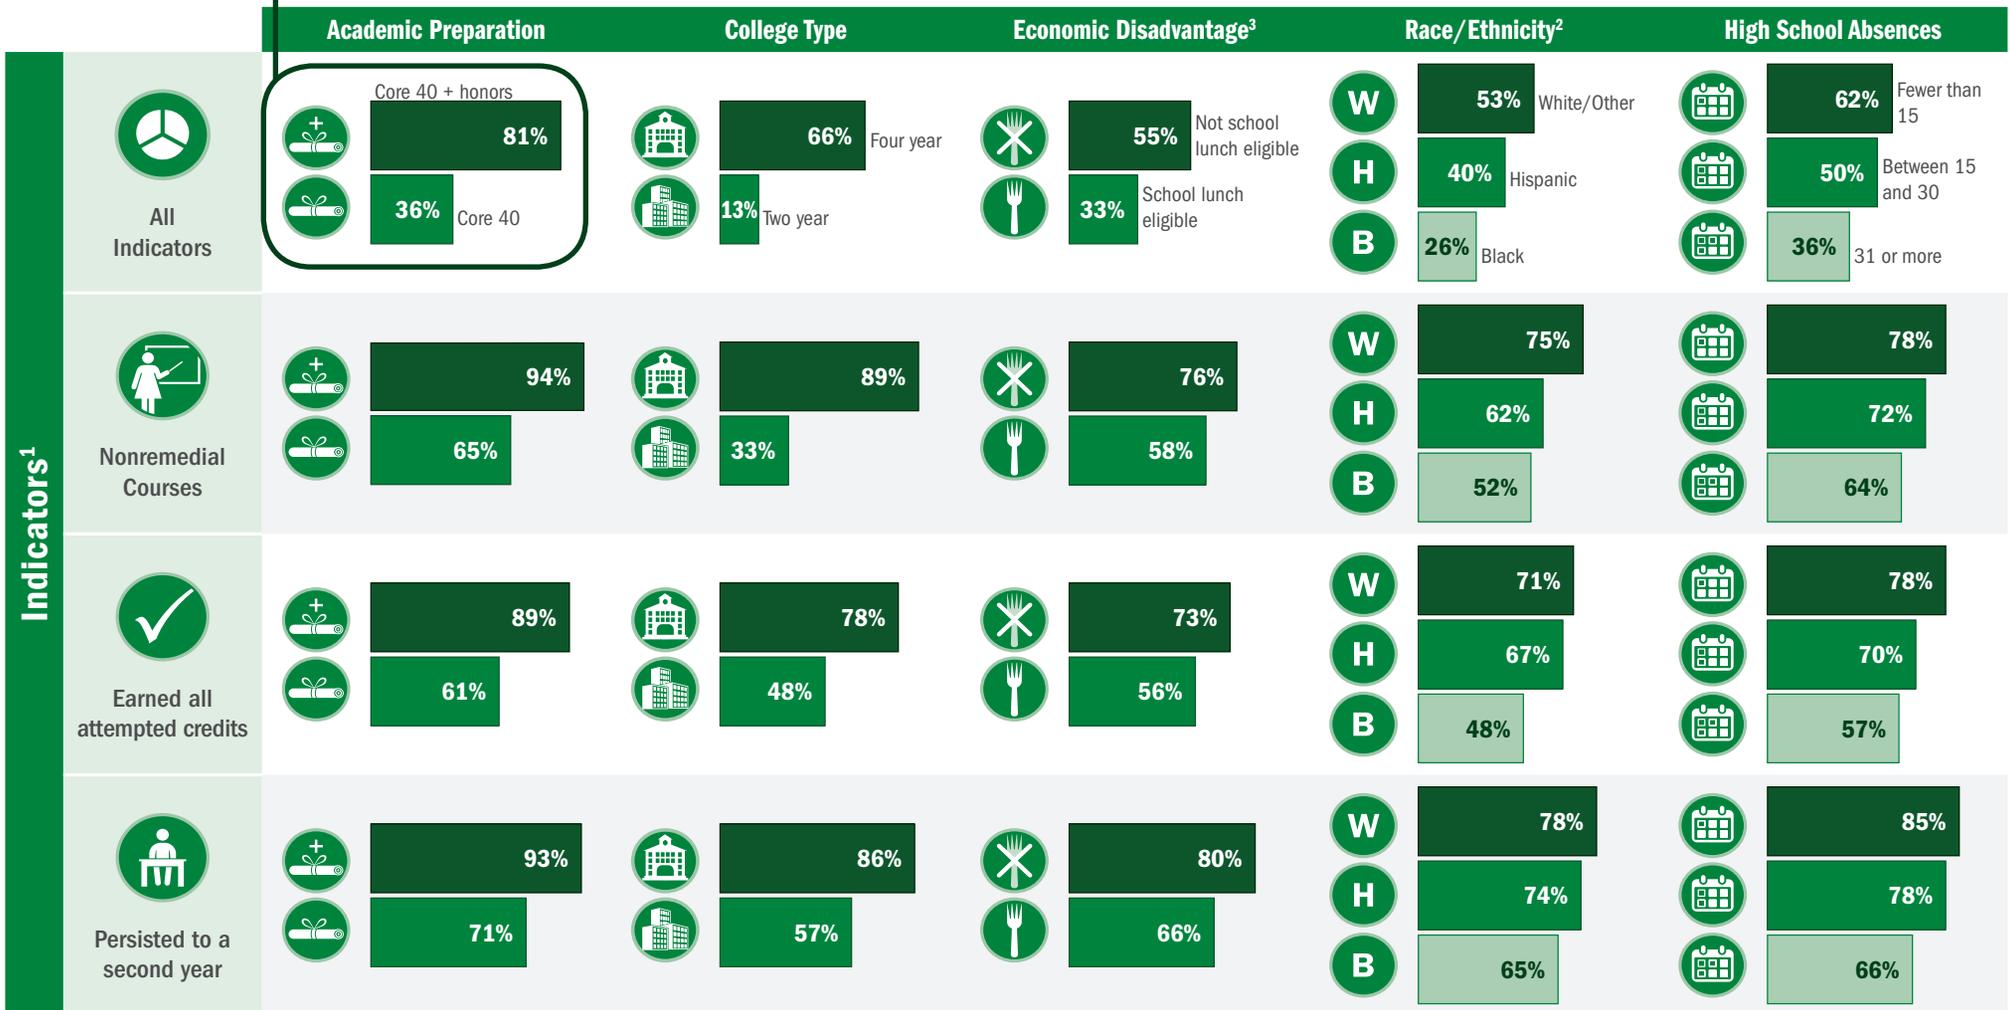

School lunch eligible
33%

The Percentage of 2010 Indiana High School Graduates Who Enrolled in Indiana Institutions of Higher Education by Indicators of Early College Success⁴

How to read chart:

Eighty-one percent of 2010 Indiana high school graduates who enrolled in an Indiana institution of higher education (IHE), and who graduated high school with a Core 40 Diploma with honors, met all three indicators of success compared with 36 percent of Indiana high school graduates enrolling in an Indiana IHE who graduated with a Core 40 diploma without honors.

All Indicators =
 Nonremedial Courses +
 Earned all attempted credits +
 Persisted to a second year

Endnotes

- ¹ Most of the variation across students in early college success was not explained by the examined predictors from the state longitudinal data system. Models based on the available data explained 35 percent or less of the variation in all the examined indicators for students first entering a two-year college and 26 percent or less of the variation in indicators for students first entering a four-year college.
- ² “White/Other” includes Whites, Asians, Native Americans/Alaska Natives, and students of two or more races.
- ³ Economic disadvantage was determined by students’ eligibility for school lunch programs.
- ⁴ Differences displayed are based on analyses of the full population of Indiana students who graduated from high school in 2010 and enrolled in an Indiana IHE. As a result, tests of statistical significance do not apply.
