Identifying and Transforming Educational Inequities

*What might we need to know and do to interrupt implicit bias and microaggressions in an educational setting?*

Dr. Gregory Peters, SF-CESS

Overview of the two part series

Part 1 - Today!

• **Opening Moves** – Introduction, Community Building

• **Focused Work**
  – Calibrating Context and Language: School Climate, Implicit Bias and Microaggressions
  – A Framework for Transformation
    » Stage I: Stance and Schema Awareness
    » Stage II: Interruptive and Catalytic Experiences

• **Closing Moves** – Reflections and Looking Forward

Part 2 – October 26

• **Opening Moves** – Review, Community Builder

• **Focused Work**
  – A Framework for Transformation, Continued
    » Stage III: New Meaning Making
    » Stage IV: Bold Action/ Radical Change

• **Open Space** – Q and A

• **Closing Moves** – Implications, Commitments, Evaluations
Part 1

Moving into awareness and interruption
“If we want to grow as teachers, we must do something alien to academic culture: we must talk to each other about our inner lives - risky stuff in a profession that fears the personal and seeks safety in the technical, the distant, the abstract.”

— Parker J. Palmer, The Courage to Teach: Exploring the Inner Landscape of a Teacher's Life
Objectives: We will...

Deepen our understanding of **implicit bias and micro-aggressions**, and how they relate to school climate & culture

Begin to **engage in inquiry** – individually and collectively about the role bias and micro-aggressions play in our lives in “the skin we are in” and across our professional relationships (colleagues, staff, students, faculty, admin, etc.)
What brings us to this conversation (in the skin we are in)?

In 1779, Thomas Jefferson proposes a two-track educational system, with different tracks in his words for "the laboring and the learned." Scholarship would allow a very few of the laboring class to advance, Jefferson says, by "raking a few geniuses from the rubbish."

- **Historically**, the very design of public education intend to serve some better or worse than others.

- **Professionally**, we espouse a commitment to equitable outcomes for every student regardless of demographic predictors.

- **Personally**, our own formative experiences – in the skin we are in – inform our work and relate results. Our own includes those as students (invisible), teacher (throw-away kids) and leaders (ally-activist).

*What brings you to this conversation – in the skin you are in?*
Opening Chat: As you look at this image...

*What do you think?*  
*What do you feel?*

Programs, Interventions, Services, and Curricula

Beliefs, Norms and Values
How does the under influence the over?

- Programs, Interventions, Services, and Curricula (e.g. Trauma-informed, PBIS, Restorative practices)
- Behaviors: Micro & Macroaggressions
- Beliefs, unchecked norms, and values
- Dominant Culture
- Dominant Discourse
- Thoughts, Feelings, Needs, Past History (conscious and unconscious...BIAS!)
Implicit Bias:
The attitudes and stereotypes that unconsciously affect people's perceptions, actions, and decisions

(Kirwan Institute for Race and Ethnicity).

• **Disproportionality in discipline**: Policies that appear racially neutral on their face, but result in the over-representation of students of color - particularly black boys -- in suspensions, expulsions, and referrals for subjective infractions like "defiance."

• **Disproportionality in special education**: Misguided placements that result in the over-representation of culturally and linguistically diverse students in special education programs.

• **Educator mindsets and beliefs**: Underestimating the intellectual capacity of culturally and linguistically diverse students, and often girls, inside the classroom.

• **Tracking**: School policies that automatically place students of color in remedial or low-track courses.

• **Dominant discourse**: Ways of thinking and talking about students and families that diminish, underestimate, or even pathologize them (also referred to as deficit based).

Micro for whom? Microaggressions

“Brief and commonplace verbal, behavioral, or environmental indignities, **whether intentional or unintentional**, that communicate hostile, derogatory, or negative slights and insults towards people of marginalized groups.”

- Perpetrators often unaware of such communications with people of marginalized groups
- Cut across all social identities
- Intention does not always equal IMPACT

## Microaggressions: Three ways of surfacing

<table>
<thead>
<tr>
<th>Micro-assault (~conscious)</th>
<th>Micro-invalidation (~unconscious)</th>
<th>Micro-insult (~unconscious)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Explicit identity-based derogations characterized primarily by a violent verbal or nonverbal attack meant to hurt the intended victim through name-calling, avoidant behavior, or purposeful discriminatory actions.</td>
<td>• Actions that exclude, negate, or nullify the psychological thoughts, feelings, or experiential reality of people who represent different groups.</td>
<td>• Behaviors, actions, or verbal remarks that convey rudeness, insensitivity, or demean a person’s group or social identity or heritage.</td>
</tr>
</tbody>
</table>

Interpersonal and Environmental
How do we interrupt beliefs, practices and experiences that are harming our students, staff, schools and systems?

“I actually think that is true, that teachers are taught to base... to judge students when they first see them... Let’s say they’re Black or something... Some teachers will kind of be with a cautious approach... watching them and how they act, or some teachers will just judge them and just separate them or something.”

Stance & Schema Awareness: The Skin We Are In

1. If “the skin you are in” represents characteristics and experiences that influence who and how you show up each day, then how do you describe “the skin you are in”?

2. How might others - especially the students in your care - describe the skin you are in?

3. How do your own experiences, consciously or unconsciously, influence your actions with students like – and unlike – you?
Stage 1 Closing Reflection

Interruptive & Catalytic Experiences: Disrupting Our Mental Models

A Different Discourse Is Needed

“Good words will not give my people good health and stop them from dying. Good words will not get my people a home where they can live in peace and take care of themselves. I am tired of talk that comes to nothing. It makes my heart sick when I remember all the good words and broken promises.” - Chief Joseph

A Different Discourse Is Needed

DISCOURSE I

The language typically used to talk about, question and plan the work of schools, change or reform.

Discourse I dialogue supports and maintains the status quo without appearing unresponsive to outside demands for improvement.

DISCOURSE II

The language that tends to be about uncomfortable, unequal, ineffective, prejudicial conditions and relationships in schools.

Discourse II opens up space for ambiguity and change to be parts of a purposeful structure.

ON COMMUNITY NORMS

• Be On Time → Stay Engaged
• Be Respectful → Experience Discomfort
• Step Up/ Step Back → Pay Attention to Patterns of Participation
• Assume Best Intentions → Speak Your Truth

REFLECTION/DISCUSSION

• What are your community’s explicit norms and how do they compare to your implicit or unspoken norms?
• To what extent do these norms encourage and foster interruption?
• Whose cultural norms are most prominent in your community – who do they serve best? Least?
Stage 2 Closing Reflection

*When have you faced an interruption in your schema-to the way you viewed the world and your relationship to it?*

*What allowed for that to happen?*

Questions to bring back to practice

1. What challenges come to mind when thinking about your perspective and approach to interrupting dominant discourse?

2. What challenges come to mind when thinking about your colleagues’ perspectives and approaches to interrupting dominant discourse?

3. What might be some strategies to speak to areas of challenge?

4. How might you create meaningful opportunities for ensuring a school-culture/climate that values engaging in these hard conversations?

5. What are you already doing to cultivate a climate of discourse disruption, and what else can we do?

6. What we need more help with or have questions about?
