### Session Overview

Participants will be introduced to Student Learning Objectives and student growth models as methods for measuring student achievement, student trajectories, and educator effectiveness. The purpose of this presentation is to ensure that participants are aware of Student Learning Objectives and student growth models as possible components of the new Educator Growth System that is under development and understand how these elements might provide additional data for evaluation and professional development decisions.

### Participants

#### REL Southwest

- Janice Keizer, Senior Technical Assistance Consultant
- Andrea Guiden, PhD, Senior Researcher
- Eric Larsen, PhD, Principal Economic Researcher

#### Santa Fe Indian School

- Anya Dozier Enos, Educational Development Director
- 15 members of Santa Fe Indian School Educator Evaluation Team

### Objectives

- Provide an overview of Student Learning Objectives and student growth models as possible components to the Santa Fe Indian School Educator Growth System.
- Engage participants in a discussion about Student Learning Objectives and student growth models.
