

Prepare to Share: Planning/Drafting Lesson Plan with Gradual Release

Directions: Complete this activity after Session 2.2 and share it in Session 2.3.

Use the **Teaching Strategies Lesson Plan Template** to develop and implement a gradual release lesson plan to teach a planning or drafting strategy to students. Use the table below to record reflections on the lesson.

Reflection

Which strategy did you select?
What part of the writing process
did it align with?

What key aspects of think-aloud
modeling did you incorporate
when modeling your selected
strategy?

How did your students respond
to your instruction? Did you see
any signs of productive struggle?

If you taught this lesson again,
what might you change? Why
would you make these changes?

How did you scaffold or
differentiate instruction?

What examples of student
success did you see? What are
the next steps for your students
(for example, additional support,
independence)?
